

## RAWA 30" WATER MAIN REPLACEMENT PROJECT

Reading Area Water Authority will be replacing approximately 700 feet of 30" diameter water main on Route 61 (Center Avenue). The water main replacement is in the north bound shoulder and will be from 50 feet north of Witman Road and extend 650 feet south of Witman Road. Current schedule is to mobilize to the site on October 29, 2018 and complete the work by November 16, 2018 (temporary paving in place for the winter). The Contractor intends to work from 7:00 am to 5:00 pm, Monday through Friday. Extra work hours may be required during some sections of the pipe construction. Traffic will be allowed to pass in both directions through shifted lanes. Single lane restriction with flaggers may occur during non-peak travel hours depending on construction activities. Access to Witman Road will be allowed via flagman during this section of the project. There will be no service interruptions to any water customers.
